

ALBERT DARNELL LTD

Albert Darnell, Grimsby – North East Lincolnshire

Albert Darnell Ltd would recommend “Flixborough Eco Technologies” to anyone looking to solar power solutions, for reducing energy costs for your business whilst supporting the environment.

We found the whole process from start to finish well organised and very professional. The team took care of all the H&S implications and ensured the installation in no way effected the day to day operation of the site
The communication was proactive and the whole installation was completed ahead of schedule.

The system is operating well and contributing over and above the return we expected prior to installation.

Technical support has been very good, and we will well supported in after sales support.
